

PBX SIP Trunking

net2phone's SIP Trunking is an ideal solution for businesses with an on-premise IP-PBX who wish to reduce telecom expenses but are not ready to do a complete replacement or dispose of their PBX equipment.

Better United

Integrating easily into your existing PBX, net2phone's SIP Trunking solution allows you to make phone calls using PBX's internet connection. No extra hardware is needed, so you can benefit from the savings immediately.

Enjoy flexible, reliable, and secure voice services with enterprise grade features:

- ✓ Unlimited nationwide and international calls to 40+ countries
- ✓ International Virtual Numbers (DIDs) from 50+ countries and 300+ cities
- ✓ Hybrid SIP and Hosted environment support
- ✓ Enhanced quality of service (QoS) for voice communications
- ✓ Increased security with 4 types of authentication
- ✓ Support for both high quality and low bandwidth codecs (G.711 and G.729)
- ✓ Certified and compatible with most IP-PBXs and gateways

Certified & Compatible

Extensive interoperability testing with major players in the IP-PBX industry has ensured net2phone's SIP Trunking solution is in the top of its class.
